Sequence Compliance

This application contains sequence disclosures that are encompassed by the definitions for amino acid sequence set forth in 37 C.F.R. § 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 C.F.R. §§ 1.821-1.825 for the reason (s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

The sequence recited in present claim 24 has 4 amino acids. The sequence rules embrace all amino acid sequences of at least 4 amino acids. See MPEP 2421.02 The sequence rules embrace all unbranched nucleotide sequences with ten or more bases and all unbranched, non-D amino acid sequences with four or more amino acids, provided that there are at least 4 “specifically defined” nucleotides or amino acids. The rules apply to all sequences in a given application, whether claimed or not. All such sequences are relevant for the purposes of building a comprehensive database and properly assessing prior art. It is therefore essential that all sequences, whether only disclosed or also claimed, be included in the database.

Applicant is required to provide a SEQ ID NO: for the sequence recited in claim 24 as well as the sequence listing including the claimed sequence in a computer readable form.
